

MIDAS # 5460
HALFMOON POND

ST. ALBANS TWP,
 SOMERSET CO., MAINE

36 ACRES

HALFMOON POND

St Albans Twp., Somerset County
U.S.G.S. Corinna, Maine

Fishes

White perch
Yellow perch
Chain pickerel
Minnows
Golden shiner

White sucker
Hornpout (bullhead)
Pumpkinseed sunfish
Black crappie
American eel

Physical Characteristics

Area - 36 acres

Maximum depth - 23 feet

Temperatures:

Surface - 70⁰F

20 feet - 53⁰F

Principal fisheries: Chain pickerel, black crappie, white perch

An oxygen deficiency occurs during the summer months at Halfmoon Pond thereby limiting the sport fishery to warmwater species. White perch, chain pickerel, and more recently black crappie provide, at times, for some fast fishing. The black crappie migrated into the pond from the Sabasticook River.

Access to Halfmoon Pond is very limited since there is currently no public right-of-way.

Surveyed - August, 1962

Revised - 2000
